Audience: Journalist and Students

Problems?

currently a lot of time is used to find information about certain topics and data related to it. our product will have accurate data and information for a variety of topics

Benefits?

It would save a lot of time when doing research. makes the data easier to use has well.

Issue

The issue that my product is meant to fix is credibility research. You would be able to use just are page for all the information on you article or assignment.

So What?

I don't understand what this is asking for. But our website can change the future of research by making it easier for students and journalist to research certain topics.

Solutions?

by taking information from a database and showing it in a easy to read format we can have more people use the data and if they want to change the format we can link the database. we will also have links to information related to the data that has been checked by us.
